

Get Ahead with Our Expert vCIO Services

Our virtual CIO (vCIO) services provide businesses with executive-level IT leadership that transforms strategic and technical conversations into real results. With vast experience across platforms, tools and industries, our vCIOs act as trusted advisors, helping organizations align technology with business goals in a way that's practical, secure, and scalable

Our experts help facilitate critical technical discussions, including:

- IT and business alignment strategy
- Compliance, security, and regulatory planning
- Vendor evaluation and contract oversight
- CapEx vs. OpEx cost comparison and planning
- Cloud adoption and digital transformation roadmaps
- IT team mentorship and skill development

What Our vCIO's Deliver

- ✓ Improved agility and faster decision-making
- ✓ Reduced IT and compliance risks
- ✓ Better visibility and control over IT costs
- ✓ Greater satisfaction with your technology experience

How It Works

STEP 1

Discover

Our consulting sessions consist of an open dialogue to learn more about your current challenges and goals and assess which systems and processes are helping or hindering those goals. We also look at overlap in technology product and spend so that we ensure you're getting the maximum ROI.

STEP 2

Strategize

Formulate an IT plan that aligns with your business goals. Once we have an understanding of the business and technology, we can design a roadmap and budget that addresses all your objectives in a cost-effective and timely manner.

STEP 3

Execute

After we have an approved budget, timeline and plan in place, our team of engineers is available to help support in executing upon the items outlined in the roadmap and delivering regular reports on the network health, systems, usage and any other key IT performance metrics.

STEP 4

Optimize

Provide mentoring services, vendor management, and more. Our work doesn't stop when the roadmap is complete. With our vast experience, we're always looking for new and improved methods to optimize your IT performance and spend.

The IT sector at our organization was enhanced when Managed Solution came on board. I would like to take this opportunity to tell you how impressed the staff and I are with your engineers. They are knowledgeable and able to appreciate and solve any problems that have arisen. They are thorough in their questions in order to understand and analyze a situation. They take the initiative and do whatever needs to be done to resolve an issue.

Jackie Clark, VP of Finance
